Cell-Ph. No.: + (964) 772 750 1102

Profile

Successful statistician/operation research analyst and mechanical engineering professional with experience in art technology/speed camera techniques, categorical data analysis of multivariable experimental phenomena, performing testing procedures utilizing reliability analysis tools, censored data analysis, using Photron Fastcam Viewer (PFV) and Thermal Imaging Cameras processes in modeling reliability problems, design of experiment, process control, large-scale optimization, development of analytical tools and scalable computational schemes for optimization and equilibrium problems, real-time big data analytics for Mechanical/power system, and supply chain management. Innovative, and efficient solutions to mechanical/power problems through a profound knowledge of the underlying Heat, physics and mathematics as well as computational tools, written and verbal communication skills, and excellent work ethic.

Education

Basrah University, Iraq and Cardiff School of Engineering

- Ph.D., degree in Mechanical Engineering/Power **JUN 2010**
 - **Concentration:** Direct Contact Heat Exchanger, Volatile Drops, Immiscible Liquid, Art technology
 - **Advisor:** Prof. Dr. A. A. Rageb, Basrah University, College of Engineering, Iraq
 - Prof. Dr. A. J. Griffiths, Cardiff University, School of Engineering – Wales – UK.

University of Baghdad, Baghdad, Iraq

MAY 2002

- Integrated BS & MS dual degree in Mechanical & Nuclear Engineering
 - **Concentration:** Two phases fluid dynamic, thermal analysis
 - **Advisor:** Dr. Mugdam Muhmood Salah

Related Coursework

Advanced Heat Transfer Conduction/Convection, Direct Energy Conversion, Turbulence, Boiling, Condensation, Micro-finned Tubes, Boundary Layer Theory, Advanced Measurement Methods, Advanced Fluid Mechanics, Micro-Nano Fluids, Advanced Mathematics, Theory of Flight, Aircraft Electricity and Instruments, Aircraft Engines, Aircraft Structure, Aircraft Engines and Jet Propulsion, Aircraft Design, Aircraft Systems and Maintenance, Advance Computer Programming.

Work and Research Experience

Vice Dean for Scientific Affairs and Graduate

FEB. 2017-Now

Engineering Technical College, Al-Furat Al-Awsat Technical University, 51009, Iraq

- Vice Dean's Office for Scientific Affairs and Students is one of the pillars on which the Dean of the Faculty of Engineering at Al-Furat Al-Awsat Technical University is based ... This office is the main link responsible for following up conferences, seminars, seminars and scientific activities in the college as well as follow up the affairs of students of preliminary and higher studies and Discipline during their university studies and after their graduation from college.
- The Vice Dean's Office for Scientific Affairs and Graduate Studies consists of several divisions: the Division of Undergraduate Studies, the Scientific Affairs Division, the Post Graduate Studies Division, the Registration Division, the Continuing Education Division, the Library of the College of Engineering and the Engineering Workshops, and each Division is responsible for the Division's activities. Perform the duties assigned to it and according to the instructions in force.

Head Aeronautical Engineering Technical Department

SEP. 2014-FEB. 2017

Engineering Technical College, Al-Furat Al-Awsat Technical University, 51009, Iraq

- The aeronautical Technical engineering department was founded in September 2014. The course takes four years to obtain a bachelor's degree and two years to obtain a master's degree in aerodynamic engineering. The high efficiency of the teaching and research program in the department has made it possible to produce in the near future qualified engineers in various industrial operation workshops and aircraft fault diagnosis. Aeronautical engineering is one of the important workshops in the field of engineering through dealing with specialized devices in the fuselage of all types related to the navigational devices of the aircraft

Head Mechanical Engineering Technical Department

OCT. 2010-SEP.2014

- The Mechanical Engineering Department was established in 1998 at the University of Al-Furat Al-Awsat Technical University, Najaf Engineering Technical College. The course takes four years to obtain a bachelor's degree and two years to obtain a master's degree in Thermal engineering. The high efficiency of the teaching and research program in the department made it able to graduate competent engineers in various industrial and productive development workshops. Mechanical engineering is one of the important workshops in the field of engineering through its dealing with specialized devices in power plants, power, cooling, air conditioning, automobiles and other things related to industrial devices. He graduated from the Department of Mechanical Engineering a lot of qualified engineers who are now working in various fields as university professors in colleges and technical institutes or in companies and scientific offices to play their vital role in building human and society.
- The opening of many workshops for the repair of Automobiles fault diagnostic devices.
- Implement international quality education systems on the curriculum.
- Holding specialized scientific conferences in the field of mechanical and communication engineering.

- **Theoretical and Experimental Study of Direct – Contact Evaporation of a Volatile Drops in an Immiscible Liquid.**
 - Developing a new thermal system by using direct contact heat exchanger.
 - New Art Technology Programing.
 - Thermal Imaging Camera.
 - Advanced Heat Transfer Conduction/Convection.
 - Direct Energy Conversion
 - Turbulence
 - Boiling
 - Condensation
 - Micro-finned Tubes
 - Boundary Layer Theory
 - Advanced Measurement Methods
 - Advanced Fluid Mechanics
 - Micro-Nano Fluids
 - Advanced Mathematics
 - Advance Computer Programming.

Cardiff University – Cardiff School of Engineering

Jun 2009- DES. 2009

- Research mission, to complete the practical requirements of my doctoral thesis for six months and the use of the newest thermal measuring instruments.
-

Head Mechanical Engineering Technical Department

OCT. 2006-JUN.2009

University of Baghdad

SEP 1999-MAY 2002

- *Design of Superheater/Percolator using Ammonia Water Mixture*
- Developing a new thermal system by using Kalina cycle and Ammonia/water mixture as a working fluid in designing a superheater / Percolator system

Teaching Experience

Course	Institution	Class Size	My Responsibilities
MATLAB Programming, ANSYS Software	Al-Furat Al-Awsat	60	Teaching students MATLAB, ANSYS software -Providing Instructions in the Lab -Demonstrating and supervising experiments -Evaluating the data processing and analyses by students -Clarifying students' doubts at every step
Heat Transfer	Al-Furat Al-Awsat	50	Lecturer
Engineering and Numerical Analysis	Al-Furat Al-Awsat	60	Lecturer
Theory of Flight	Al-Furat Al-Awsat	60	Lecturer
Aircraft Engines	Al-Furat Al-Awsat	60	lecturer
Fluid Mechanics	Al-Furat Al-Awsat	60	lecturer
Boundary Layer Theory	Al-Furat Al-Awsat	12	lecturer
Advanced Heat transfer	Al-Furat Al-Awsat	12	lecturer
Advanced Measurement Method	Al-Furat Al-Awsat	15	lecturer
Advanced Fluid Mechanics	Al-Furat Al-Awsat	12	lecturer
Advanced Heat transfer	Basrah University	4	Instructor
Advanced Fluid Mechanics	Basrah University	4	Instructor
Advanced Heat transfer	Baghdad University	4	Instructor
Advanced Fluid Mechanics	Baghdad University	4	Instructor
Calculus I, II	Baghdad University	15	Instructor
MATLAB Programming, ANSYS Software, C++	Baghdad University	15	Instructor

Mentorship/Advising Experience

- MS Student Supervisor, Anmar Adnan, Al-Westa Technical University, Thermal Engineering. JUN 2002, Perforated fin like pin Heat Exchanger.
- MS Student Supervisor, Nofil Baqer, Basrah University/ College of Engineering/ Mechanical Engineering, 3 D Simulation in Forced Convection Internally Finned Tubes, JUL. 2002.
- Ph. D. Student Advisor, Ghassan Fadhil, Basrah University/ College of Engineering/ Mechanical Engineering, Enhancement of Rotating Cylindrical Heater.
- Supervisor of dozens of graduation projects for students of the completed stages of engineering colleges.

Professional

Memberships

- Member of the main link of the Ministry of Higher Education and Scientific Research with the Iraqi Ministry of Defense / Iraqi Air Force Command.
- Member of the main link of the Ministry of Higher Education and Scientific Research with the Iraqi Ministry of Transport / Iraqi Airways.
- Chairman of the research team for thermal activities in Najaf Governorate. Iraq
- Member of the Central Committee for the construction of Najaf Aviation Academy in cooperation with the US Security Center in Iraq.
- Member of the Central Committee for the development of the aviation sector in Najaf province in cooperation with the British company Coperchase.
- Member of Mechanical Engineering Graduate Student Association-Basrah, Baghdad and Al-Westa Technical Universities.
- Member of the Iraqi Red Crescent Association
- Chairman of thermal cameras committee in Najaf province government

Educational Service

- Reviewer of Journal Papers- Al-Furat Al-Awsat Technical University Journal (2014).
- Member of the committees to discuss thesis and dissertations for mechanical and chemical engineering MS/Ph. D. students.
- Teaching Award Recipient- Al-Furat Al-Awsat Technical University- 2016 Instructor and Lecturer.
- Founder of Aeronautical Engineering Department, Engineering Technical College, Al-Furat Al-Awsat Technical University, 51009, Iraq
- Founder of Avionic Engineering Department, Engineering Technical College, Al-Furat Al-Awsat Technical University, 51009, Iraq
