

عنوان البحث	اسم التدريسي	ت
A comparative experimental analysis for a single slope solar still with evaporation process enhancement	حسنين غني حميد	1
Exergy analysis of the effects of extreme hot conditions on cooling system efficiency: A case study of a split air conditioner	عادل عبد عزيز عيدان	2
Enhancing Evaporative Cooler Efficiency through Magnetized Water and Heat Exchanger Optimization		
Active Vibration Control of Piezoelectric Composite Plates Using Gain Scheduling Method		
The performance of cylindrical solar still with hemispherical dome using circular fins in basin	ظافر مانع حاجم	3
Comparative assessment of thermal oils and water as working fluids in parabolic trough collectors for enhanced solar power generation		
Advancements in silicon solar cells: efficiency enhancements and performance optimization		
The performance of cylindrical solar still with hemispherical dome using circular fins in basin		
Enhancing the Performance of Photovoltaic Solar Cells Using a Hybrid Cooling Technique of Thermoelectric Generator and Heat Sink		
Experimental study and comparison of the use of solar cells as desalination units in water production		
Investigating the impact of natural dyes on the deposition process of crystalline silicon solar cells		
Numerical Investigation of Hemispherical Solar Still Performance With Optimal Amount of PCM as a Heat Storage		
Enhanced photovoltaic/thermal systems with innovative collector designs		
Thermomechanical modelling to optimise friction stir welding of Ti-6Al-4V alloy validated by microstructural analysis	منتظر عبودي	4
The performance of cylindrical solar still with hemispherical dome using circular fins in basin	وسام احمد عبدالواحد	5
Different glass cover designs for solar stills:		

Numerical Investigation of Hemispherical Solar Still Performance With Optimal Amount of PCM as a Heat Storage		
Empirical Study of Performance Improvement by Cylindrical Solar Still Height Utilizing a Hemispherical Dome		
Investigating the techniques used for improving the aerodynamic performance of Archimedes spiral wind turbines: A comprehensive review and future work avenues	بلاسّم عبدالامير جبار	6
Performance Evaluation Investigation for Conventional Solar Still with Different Additives		
Effect of blades shape and duct geometrical parameters on aerodynamic performance of a small-sized axial fan"		
Performance enhancement of pyramid solar still integrated with material, and fins: Thermal, exergy, economic, and environmental	هاشم سهر محيسن	7
Performance assessment of rotating spiral-shaped baffles built-in analysis		
Enhancing productivity and cost-effectiveness of single-slope solar Experimental and performance analysis		
A flat plate solar collector unsteady analysis using graphite nano		
Parametric Study of Heat Transfer in Shell and Tube Heat Exch Ethylene Glycol Mixtures		
Decentralized Solar Cooling Systems for Urban and Rural Appli		
Review Paper on Beamforming Technique Based on Smart Antenna Systems	هدى بلاسم احمد	8
A comparative experimental analysis for a single slope solar still with evaporation process enhancement	باسل نوري مرزه	9
THE LATEST DEVELOPMENT IN DOUBLE GLASS WINDOW		
Harshness and Loneliness in The Catcher in The Rye	محمد سالم عبدالامير	10
Mary Barton (1848) – Elizabeth Gaskell		

A Midsummer Night's Dream (c. 1595-6) – William Shakespeare		
Numerical Analysis of Forced Convection for Staggered Cylinders Submerged in Packed Bed Porous Media	ايناس خضير عبدالرزاق	11
Influence of Zinc Oxide and Titanium Dioxide Nanoparticles on Kevlar/Epoxy Composites	محمد علي ديوان	12
Characterization of the mechanical properties for mild steel alloyed reinforcement with nanomaterials using powder technology		
Enhancing photovoltaic thermal (PVT) performance with hybrid solar collector using phase change material, porous media, and nanofluid	زينب محمد مهدي	13
COMPARISON OF GAUSSIAN HEAT FLOW OF FSW RELYING ON VON MISES CRITERION AND CONSTITUTIVE MODELS OF YIELD STRENGTH	مهند احمد حميد	14
